-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ONE MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1 to 11 and 16 to 19, drawn to a method and apparatus for shaping internal tooth formations in a sleeve element.

Group II, claim(s) 12 to 15 and 20 to 22, drawn to a method and apparatus for forming undercuts on internal teeth of a sleeve element.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method and die elements used to form the internal teeth of Group I and the method and die elements used to form the undercuts of Group II have separate and independent utility from one another since the internally toothed sleeve produced with the Group I invention can be used without having undercuts, as produced with the Group II invention, formed in the teeth, and the invention of Group II can be used to form undercuts on internal teeth formed by processes and apparatus other than those of the Group I invention; for example, in internal teeth formed by cutting techniques rather than deformation techniques. Thus, the inventions, as grouped above, are not limited to a single inventive concept.

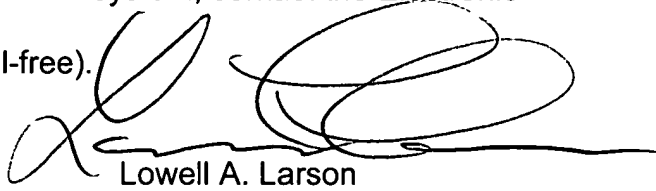

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
